POD 7,5

48 V Input Voltage
7,5 kW Power

POD 15

96 V Input Voltage
15 kW Power

POD 30

400 V Input Voltage
30 kW Power

SeaDrive
Electric drivelines

Keep the sea blue.
Go green.

Go SeaDrive.

SeaDrive
Electric drivelines

The sound. Of no sound.

Say goodbye to engine noise when you are out enjoying the sea. Except from a low humming, the only thing you will hear is the wind and the waves, making your boat life a new and even more relaxing experience.

At SeaDrive we create
maritime electric drivelines
with no compromises.

DAME Award 2019

The smell of no smell

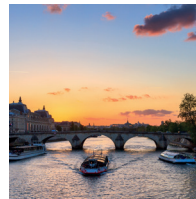

Every sailor has felt this... Moving at sea with no exhaust or smell of diesel or petrol. It's just you and the fresh air. With SeaDrive's pods you can experience this on most boats, even without wind.

A pod for every boat. Even Viking ships

Viking ships

Commercial boats

Cabincruisers

Daycruisers/
double enders

Floating homes

Sailboats

Harbour hero

The privilege of trouble free power

At sea, the last thing you want is trouble with your boat engine. With just two moving parts, all built in high quality material, SeaDrive's pods minimize the chance for something unexpected to happen.

The versatile pods from SeaDrive can adapt to almost any type of boat. Even Viking ships are being powered by SeaDrive pods.

Sensational manoeuvrability with the turnable Azimut pod

If you have ever driven a boat into a crowded harbour, you know the feeling... Will you manage to dock your boat in an elegant way?
